Q-1 Use CSS to make a yellow, 1 pixel thick, border around all paragraphs.

This is paragraph 1

This is paragraph 2

This is paragraph 3

Q-2 Use CSS attribute like padding, font and list property

Styled List Example

- this is the example.
- this example includes css attribute properties.
- this example include css list, font and padding properties.
- This is the demo of it

Q-3 Use CSS attributes like Font, color and table property

Product	Price	Quantity
Item 1	$10.00	5
Item 2	$15.00	3
Item 3	$20.00	2

Q-4 In this practical use CSS color and link properties. By default the link's color is dark gray. When you hover in this link it will be Blue, if you once clicked on that link it will turn into Purple color.

Welcome to Styled Links

Check out these styled links:

- Default Link
- Hover Link
- Visited Link

Q-5 create Registration form.
